1999-08 – 2004-07
Oxford Brookes
University

**Joint Hons BSc
Software Engineering
& Multimedia
Systems**

1995-08 – 1999-06
American Intl School of
Johannesburg
South Africa

**IB Diploma
American High
School Diploma**

Jan 2016 - April 2016
Freelancer

A friend retained me for his technology startup to build the prototype for his app. I helped his team clarify the requirements, draw up the early mockups, and started building the app in HTML5, CSS3, and JavaScript.

May 2012 - Jan 2014
Trudon

I added value to the company by working on projects that needed a turnaround or required fresh resources. I also stepped in to help the Trudon to install, customize, and deploy a product that they had acquired …. and I had never worked with the technologies before!

June 2011 - May 2012
Falcorp Technologies

The role at Falcorp's client required me to be both developer and consultant. I supported their internal custom-built business process engine and took ownership of the flow that produced their quarterly reports.

Dec 2009 - Jan 2011
South African National Parks

I was responsible for feature requests and maintenance of the external and internal websites. I led the team of 4 (including an external designer) effort to redesign the website and codebase. This involved both frontend and backend.

May 2009 - Sept 2009
Jobs.co.za

My responsibilities were to implement feature requests and support the main jobs.co.za website.

Jan 2008 - May 2009
Accenture

My roles varied from technology consultant, business analyst, and tech lead. I led the team that launched the main news site for the South African public broadcaster. My responsibilities included producing documentation and managing technology projects.

Sept 2006 - July 2007
Pod1

I was responsible for bugfixing and maintenance on various clients' websites and intranets. Also worked on internal intranet site for the agency.

July 2004 - Sept 2006
Oxford Brookes University

I supported the School of Health and Social Care's public and intranet websites. Was responsible for content management. Converted both websites for School of Health and Social Care into dynamic sites, using custom-built PHP framework.

July 2002 - July 2003
iOra Ltd.

Support programmer, as part of work experience towards my degree. Built a desktop application in Visual Basic to help with bug tracking on the development team and supported another test management application.
